

TECHNOLOGY PARTNER

Expand the reach of iManage with document automation

From creation to capture, control the entire document lifecycle without leaving iManage Work10.

Smarter Drafter expands iManage’s information governance capabilities into document creation. Through a seamless user experience, document automation and assembly are managed directly within iManage Work 10.

Smarter Drafter embeds document automation directly within iManage, adding document assembly while allowing iManage to manage precedent and clause libraries. This integration respects Work 10’s matter and version management, keeping the entire document lifecycle within iManage and maintaining a single source of truth for your firm’s information.

iManage Technology Partner

Smarter Drafter integrates deeply with iManage’s database, document store, and user interface

Document automation without leaving iManage: Automation without leaving iManage: Smarter Drafter is fully embedded within the iManage Work 10 environment, allowing you to automate document creation without leaving the platform. Clicking ‘New Document’ within a client folder launches Smarter Drafter directly in Work 10. Completed documents are automatically saved to the correct folder, adopting iManage’s required naming conventions and metadata instantly.

Integrated via the iManage Universal API: Built for the cloud, Smarter Drafter integrates rapidly with iManage Work 10, whether deployed on-premise or in the cloud. Leveraging the iManage Universal API, Smarter Drafter connects seamlessly without requiring any local installation, enabling firms to implement automation swiftly.

Integrated Capabilities

Document assembly that leverages core functionality within iManage.

Unified user experience: When integrated, Smarter Drafter adopts the look and feel of iManage, blending seamlessly into the interface with custom icons and actions that appear naturally within iManage menus. Users operate within a unified environment, accelerating onboarding and minimising training, so they can focus on delivering results without the disruption of learning a new tool.

Version control: The Smarter Drafter 'Clone' feature allows users to restart the automation for a completed document while retaining previously entered data. When integrated with iManage, cloned documents are automatically linked and versioned correctly, ensuring complete transparency and compliance with information governance policies. Smarter Drafter fully respects iManage's version management.

Precedent and Clause Management: Smarter Drafter allows both precedent and clause management to be governed by iManage. This ensures that your firm's most valuable content is secure, standardised, and easily accessible for future use.

Strategic Technology Platform

Extend your iManage investment and upgrade your user experience with Smarter Drafter

Broaden your legal tech ecosystem: Smarter Drafter integrates with your core platforms—practice management, CRM, line-of-business systems, and iManage—to enable seamless information flow between systems. The integration of Smarter Drafter eliminates data silos, ensuring that accurate and up-to-date information is accessible wherever you need it, reducing rekeying and enhancing operational efficiency across your legal tech ecosystem.

Single source of truth: An implementation of Smarter Drafter is an investment in your firm's knowledge infrastructure. By embedding automation directly into iManage, users initiate the document lifecycle within the organization's existing knowledge base. This ensures that documents are automatically filed and accessible to all users, with versioning handled accurately and consistently, reinforcing a reliable single source of truth for your firm's information.

Implementation Partners

Our Smarter Drafter Certified Partner network has been handpicked for their expertise as both Smarter Drafter and iManage Implementation Partners. Their deep understanding of both solutions and the legal domain ensures your firm sees results sooner, with a seamless integration process and ongoing support to maximise the impact of your document automation.
