

QA Tester – Open Position

Send your resume to team@tensis.com

Tensis is an Australian SaaS provider in the document automation space. We have a large presence in the Australian legal industry and ambitions to take our product global and into new industries.

Our existing dev team has already built an amazing product, but we want to accelerate our development timeline, add new and exciting features and propel ourselves to the next level in enterprise document automation.

We are looking for a QA who has an eye for detail and is a great problem solver to test our web-app across Chrome and Edge. The web-app is built in Angular on an Azure/C# backend.

The ideal candidate must:

- Have familiarity with JavaScript and ideally the Angular framework
- Develop Testing Strategies
- Write and execute tests automated cases
- Be familiar with OWASP test for common scenarios
- Being able to write-up issues and communicate with team
- Have experience with some screenshot/video tools
- Have experience with Azure DevOps

Perform rigorous:

- Regression testing (UAT test before release),
- Functional testing (new versions in Staging) and;
- Smoke tests (in prod)

Be able to:

- Scrum/Agile methodologies
- Estimate and prioritise tests
- Understand requirements within the business domain and identify when functionality may not meet user expectations as well as not perform to specification.
