tensis

Senior Angular Developer – Open Position

Send your resume to team@tensis.com

Tensis is an Australian SaaS provider in the document automation space. We have a large presence in the Australian legal industry and ambitions to take our product global and into new industries.

Our existing dev team has already built an amazing product, but we want to accelerate our development timeline, add new and exciting features and propel ourselves to the next level in enterprise document automation.

We are seeking a skilled Front-End Developer to join our dynamic team and contribute to the development of cutting-edge web applications. The ideal candidate should have a strong foundation in front-end technologies, with a focus on Angular, SCSS, HTML, and TypeScript. In addition to these primary skills, knowledge of technologies such as C#, SQL Server, Web API, Azure, and Azure DevOps will be highly beneficial.

Primary Responsibilities:

- Collaborate with cross-functional teams to design, develop, and maintain responsive web applications using Angular, SCSS, HTML, and TypeScript.
- Translate UI/UX designs into functional user interfaces while ensuring the best possible performance and user experience.
- Write clean, maintainable, and well-documented code that adheres to industry standards and best practices.
- Implement and maintain front-end architecture, ensuring scalability and reusability of components.
- Stay up-to-date with the latest trends and advancements in front-end development and bring new ideas to the team.
- Must be highly agile and able to context switch with ease.
- Must be a team player with the common goal of getting software in front of the users.

Primary Requirements:

- Solid experience with Angular framework, including components, services, and modules.
- Proficiency in SCSS (Sass) for styling web applications.
- Strong understanding of HTML5 and CSS3.
- Proficient in TypeScript and its latest features.
- Experience with responsive and mobile-first design principles.

- Familiarity with version control systems, particularly Git.

Secondary Requirements:

- Knowledge of C# programming language for potential collaboration with back-end developers.
- Familiarity with SQL Server and the ability to write basic queries.
- Understanding of RESTful Web API development and integration.
- Exposure to Microsoft Azure cloud services.
- Experience with Azure DevOps for continuous integration and deployment pipelines.
- Ability to work in an Agile/Scrum development environment.

Qualifications:

- Bachelor's degree in Computer Science, Engineering, or a related field (or equivalent experience).
- Proven track record of delivering high-quality front-end solutions.
- Excellent problem-solving skills and attention to detail.
- Strong communication skills, both written and verbal.
- Ability to work collaboratively in a team environment.
